PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable, production-grade web applications. Strong expertise in JavaScript, React.js, and Node.js, with hands-on experience developing responsive user interfaces and robust backend systems. Skilled in RESTful API development, database design (MySQL/Supabase), and multi-tenant architectures, with a focus on performance, clean architecture, and maintainability.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript
Frontend	React.js, Angular, HTML5, CSS3, Bootstrap, TailwindCSS, Responsive Design
Backend	Node.js, RESTful APIs, JWT Authentication, API Integration, PHP, Laravel
Database	MySQL (Schema Design, Query Optimization, Indexing), PostgreSQL
Concepts	Multi-Tenancy, JSON Processing
Tools	Git, Postman, Jira, Confluence, Figma, Agile/Scrum, cPanel

PROFESSIONAL EXPERIENCE

Junior Software Engineer — Promax Scientific Developers, Nagpur

Aug 2023 – May 2026

- Developed and maintained scalable full stack applications using Node.js, PHP, MySQL, and JavaScript across multiple production modules.
- Built responsive, high-performance UIs with React.js, improving usability across devices.
- Designed and optimized database schemas and complex queries for high-volume data operations.
- Developed and integrated RESTful APIs enabling efficient frontend-backend communication.
- Implemented modular, reusable components to improve maintainability and reduce development time.
- Collaborated in Agile teams from requirement gathering through deployment; performed API testing and validation using Postman.

Web Developer — Nimbja Security Solutions Pvt. Ltd., Pune

Jul 2022 – Jul 2023

- Joined as a full-time Web Developer after completing the internship, taking ownership of feature development and client deliverables.
- Worked on the Book My Parcel logistics platform, developing responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Integrated REST APIs with the frontend to display real-time shipment, booking, and customer data.
- Developed backend modules using PHP and MySQL for business workflows and data management.
- Fixed production issues, enhanced existing features, and collaborated with senior developers to deliver stable releases.
- Ensured responsive, cross-browser compatible applications while maintaining code quality and performance.

Web Developer Intern — Nimbja Security Solutions Pvt. Ltd., Pune

Mar 2022 – Jun 2022

- Completed a full-stack development internship focused on PHP, MySQL, HTML, CSS, React, JavaScript, and responsive web development.
- Assisted in developing and maintaining web application modules under the guidance of senior developers.
- Built reusable UI components, implemented frontend pages, and gained practical experience with backend development.
- Participated in debugging, testing, database operations, and feature implementation while learning industry-standard practices.
- Successfully transitioned to a full-time Web Developer role based on internship performance.

KEY PROJECTS

Digital Content Creation & Distribution Platform

Tech: React.js, Node.js, MySQL, HTML Canvas, ImageKit | Role: Full Stack Developer

- Built an end-to-end content creation and distribution platform for designing and publishing visual content to multiple digital display devices.
- Developed a Canva-like drag-and-drop editor using HTML Canvas and React.js with real-time preview capabilities.
- Designed scalable REST APIs for content management, scheduling, and device synchronization; integrated ImageKit CDN for optimized media delivery.
- Built a JSON-based rendering engine; optimized the system to handle 100+ concurrent connected display devices with reliable real-time updates.

AgendaMaker — Event Agenda Management System

Tech: Node.js (REST APIs), MySQL | Role: Backend Developer

- Designed and developed RESTful APIs using Node.js for managing event agendas, sessions, speakers, and time-based schedules.
- Engineered and optimized MySQL database schemas to handle structured scheduling data with high performance and data integrity.
- Implemented time-based scheduling logic to prevent conflicts and ensure accurate session allocation.
- Optimized SQL queries and indexing strategies to improve data retrieval speed for large datasets.
- Implemented input validation and error handling to ensure data consistency and reliability across APIs.
- Designed backend architecture with a modular and scalable approach for maintainability and future enhancements.

Human Resource Management System (HRM)

Tech: PHP Laravel, MySQL, JavaScript | Role: Full Stack Developer

- Developed a modular HRM system covering employee onboarding, attendance tracking, and reimbursement workflows.
- Implemented role-based authentication (Admin/Employee), RESTful APIs for employee data, and optimized database schemas for workforce and financial processes.

Gym Management SaaS Platform (Spartan)

Tech: React.js, Supabase (PostgreSQL, Auth, Realtime), Node.js | Role: Full Stack Developer

- Building a multi-tenant SaaS platform for gyms to manage members, trainers, attendance, and payments using tenant-based architecture (gym_id isolation).
- Implementing role-based access control (Admin/Staff/Trainer) via Supabase Auth and JWT; leveraging Supabase real-time for live attendance updates.
- Creating interactive dashboards in React.js for analytics, revenue tracking, and operational insights.

EDUCATION

Bachelor of Engineering — Information Technology

2019 – 2023

Sipna College of Engineering & Technology, Amravati, MH, India | CGPA: 7.5 / 10

LANGUAGES

English (Professional) | Hindi (Native) | Marathi (Native)
